### **DETAILED ACTION**

This is an Allowance for application no. 10/031,593 in response to the RCE filed on June 19, 2006 wherein claims 1-15 are presented for examination.

#### ***Allowable Subject Matter***

Claims 1-15 allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose a method or system of compressing and processing for multi-screens a plurality of digital video signals on respective channels by multi-thread scaling comprising the step of outputting scaled digital video signals from analog/digital converters having a first resolution for compression or having a second resolution for a multi-screen process depending on even/odd fields of input video signals.

The closest prior art (US 6,219,030 to Nonomura et al.) discloses a similar system and method of processing depending on even/odd fields. However, Nonomura fails to particularly teach or suggest "outputting scaled digital video signals from analog/digital converters having a first resolution for compression or having a second resolution for a multi-screen process depending on even/odd fields of input video signals" as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
